Biologically sound; no odor.*

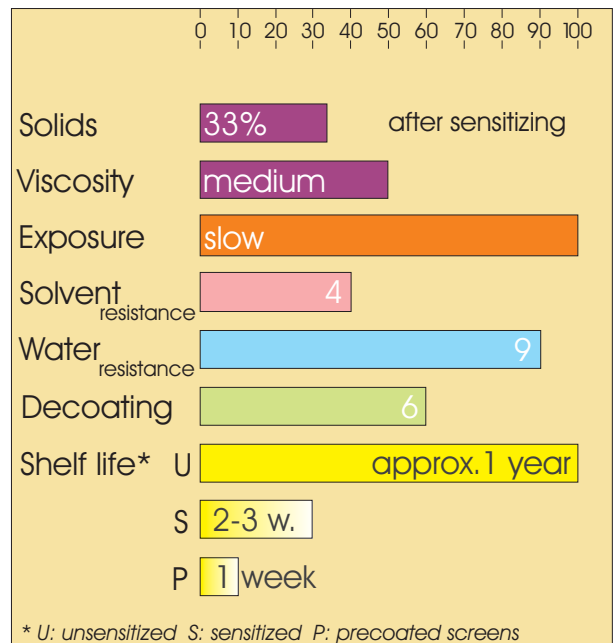

www.fotec.ch

General Description:

- Separate diazo-powder sensitizer to be mixed with warm water. Additional water can be added to lower viscosity.
- Purple colour after exposure with excellent transparency.
- Let degass for several hours before coating.
- Most suitable for textile & ceramic tile printing.
- Simple to use with good resolution and high definition.

Technical indication:

For safe use refer to product MSDS.
