## Product Information

Küsnacht, February 2011

# ***A new generation of chemical stencil hardener (catalyser)***

---

### **FOTECHEM 2113** stencil hardener

- A ready-to-use liquid.
- Hardening without heat.
- Instant hardening reaction.
- Can be applied by sponge to both sides.
- No odour, clear.
- Free of volatile chemicals (VOC).
- No solids.
- Not classified as "Dangerous Goods"

### **FOTECHEM 2113** stencil catalyser

- Makes solvent resistant FOTECOAT emulsions water resistant and very difficult to decoat.
- Makes water resistant FOTECOAT emulsions permanent.
- Increases the print resistance of stencils made with water or solvent resistant FOTECOAT emulsions. (For stencils made with dual-cure emulsions hardening is not recommended because it renders the stencil more brittle.)

### **FOTECHEM 2113** stencil hardener

Is now available from stock 24x1 litre or 1x25 litres.

### **FOTECHEM 2113** stencil catalyser

- Attractive price. Please ask for our offer.
- Is lower priced than our most effective hardener FOTECHEM 2110 but is slightly more expensive than our standard hardener 2100; however it is more effective in the application.

### **FOTECHEM 2113** stencil hardener

- 1 litre samples can be added to your next shipment, free of charge.
- MSDS available on request.
- "Technical Information" sheet and table for FOTECHEM hardener: [www.fotec.ch](http://www.fotec.ch)

***easy to use***

***high efficiency***

***moderate price***
